

## **Adrenal & Respiratory Support (Atemwege)**

### **Giles Vines—California, May 2003**

Jiaogulan helps a whole lot for my congestive heart failure. I know because I stopped for a while then started again, and the difference is dramatic. My wife takes it too. We're both in our nineties.

### **Dr. Gabriel Cousens, M.D.—Arizona, January 2002**

I am most impressed with how many people respond to jiaogulan for adrenal support and building the Kapha energy for strengthening the upper respiratory system. It has become one of my top choices for healing weakened adrenal function.

### **Arthur Farrington—Washington, May 2002**

I have had bronchitis for about 4 weeks. I took all kinds of herb tinctures and antibiotics from the doctor, which didn't do anything. I've had bad coughing spells, which were very debilitating. I couldn't sleep at all and I wasn't getting better. Then I found you from the book *Underground Cures* and ordering jiaogulan. This is now the 5th day since I started taking jiaogulan. I took 1 capsule 3 times a day and it immediately began to work. The phlegm has been coming up very easily, with hardly any coughing. My feeling of restriction in breathing is completely gone. I thought I was about to get pneumonia. Now I am feeling fantastic.

### **Milton Hagan—Montana, June 2002**

I've been troubled with Emphysema and Bronchitis. The Jiaogulan Herbal Pills helped me breathe easier.

UPDATE, May 2003:

I used the pills for a while and it helped my chronic bronchitis, and then stopped for a while to make sure. Now I can see it definitely helps.
