

Cancer (Krebs)

Wayne Martin—California, July 2001

After I had my esophagus removed due to cancer, I heard about jiaogulan. I take it for the antioxidant protection to help my body fight the cancer, which has been spreading to my lymph nodes. The doctor calls it type 3. I also like the energy it gives me.

UPDATE, January 2002

I've still been taking the jiaogulan capsules, and recently had a CT Scan. The doctor was amazed to find that there was no sign of cancer any more.
